

IBRAHEEM BELLO

Backend Engineer

Lagos, Nigeria | belloibrahimolawale@gmail.com | 080 6542 6444
ibraheembello.com | github.com/ibraheembello | linkedin.com/in/ibraheem-bello

PROFESSIONAL SUMMARY

Backend Engineer specializing in Node.js, TypeScript, and NestJS, with hands-on experience building scalable, well-tested REST APIs and production services backed by PostgreSQL. I ship secure systems using JWT and OAuth authentication, API key hashing, webhook verification, and OWASP-aligned practices, and I deploy them on AWS and Azure with GitHub Actions CI/CD. HNG Internship Finalist (top 450 of 12,362) and Backend Engineering student at AltSchool Africa, where I serve as cohort Vice President. I use AI coding assistants such as Claude and GitHub Copilot as part of my daily workflow to debug faster, review code, and document systems, while keeping ownership of every technical decision. I care about clean, secure, well-tested code and enjoy solving hard backend problems end to end.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML/CSS
Backend: Node.js, Express.js, NestJS, RESTful API Design, Microservices, WebSockets, Asynchronous Programming
Databases: PostgreSQL, MongoDB, TypeORM, Prisma, Mongoose, Redis
Testing: Jest, Unit & Integration Testing, Postman, API Test Automation
Security & Auth: JWT, OAuth 2.0, API Key Hashing, Webhook Signature Verification, OWASP Principles
DevOps & Tools: Git & GitHub, Docker, GitHub Actions (CI/CD), AWS (EC2), Azure, Nginx, PM2, Swagger, Linux/Bash
AI-Assisted Development: Claude / Claude Code, GitHub Copilot, ChatGPT, Prompt Engineering, AI-assisted debugging & code review

EXPERIENCE

- Backend Intern (Finalist), HNG Internship***Oct 2025 – Dec 2025 | Remote*
 - Built a production-ready wallet service in TypeScript and NestJS with Paystack deposits, wallet-to-wallet transfers, Google OAuth, and scoped API keys, deployed to Azure with GitHub Actions CI/CD.
 - Hardened the service with JWT auth, API key hashing, and webhook signature verification, and documented every endpoint with Swagger for a clear contract with API consumers.
 - Wrote automated unit and integration tests to guard payment and transfer flows against regressions before deployment.
 - Used AI coding assistants to accelerate debugging and code review under tight deadlines, then verified and owned each fix; selected as a Finalist (top 450 of 12,362 interns).
- Backend Engineering Student & Vice President, Baraka Cohort, AltSchool Africa***Feb 2025 – Present | Lagos, Nigeria*
 - Building scalable backend applications with Node.js, Express, NestJS, and PostgreSQL through project-based learning covering API design, testing, security, and deployment.
 - Serve as Vice President of a 100+ member cohort, organizing peer learning sessions and technical workshops that improved understanding of core backend concepts.
 - Advocate for student feedback into curriculum decisions, practicing the clear communication and collaboration expected in cross-functional teams.

SELECTED PROJECTS

- Wallet Service with Paystack, JWT & API Keys***HNG Stage 8*

Node.js · TypeScript · NestJS · PostgreSQL · TypeORM · Paystack · Azure · GitHub Actions

 - Production-grade payments backend: deposits, transfers, OAuth login, and API key management, secured with webhook signature verification and API key hashing, shipped with Swagger docs and automated tests.
- Eventful — Full-Stack Event Ticketing Platform***AltSchool Capstone*

Node.js · TypeScript · React · PostgreSQL

- End-to-end ticketing platform: event publishing, QR-coded ticket sales, attendee management, reviews, analytics, and email notifications, designed around real creator and attendee workflows.

SchoolBase Backend API — Open-Source Contribution (HNG)

2026

TypeScript · NestJS · Multi-Tenant Architecture

- Contributed to a multi-tenant educational portal API serving web and mobile clients, focused on modular architecture, authentication, and secure, tenant-specific data handling.

Personal Portfolio & API — ibraheembello.com

2026

Node.js · Express · React · AWS EC2 · Nginx · PM2 · GitHub Actions

- Designed, built, and self-deployed a full-stack portfolio with a REST API on AWS EC2 behind Nginx with automated CI/CD; diagnosed and fixed a production build failure using an AI-assisted debugging workflow (Node heap exhaustion resolved with heap tuning and swap).

EDUCATION

Backend Engineering Diploma, AltSchool Africa

Feb 2025 – Present (Expected Feb 2026), Lagos

- Coursework: Node.js, RESTful APIs, microservices, database management, testing, security, and CI/CD deployment.

CERTIFICATIONS & AWARDS

- HNG Internship Finalist — Backend Development Track (top 450 of 12,362 interns), 2025
- Back End Development and APIs — freeCodeCamp
- JavaScript Algorithms and Data Structures — freeCodeCamp
- Responsive Web Design — freeCodeCamp
